## Overview & research interest

I am a senior software product manager at Crowdbotics (low code/no code platform). My research interest is designing large scale intelligent software system, find patterns and reuse. In terms of software products, my interest is to design AI-driven components that can help both individuals and communities solve their problems. Through the application of various analytical tools and meticulously designed algorithms, I would like to expand my expertise by incorporating my skills into academic and industrial projects with practical applications.

## EDUCATION

**Eastern University Bangladesh** **2015-2019**  
*B.Sc. in Computer Science and Engineering*
